More.Groupware

- **Homepage**
 - <http://mgw.k-fish.de/Home.9.0.html>
- **Features**
 - Contact/address management
 - Webmail
 - full-featured Calendar
 - ToDo management
 - News
 - Project management
 - Some preferences for each module
 - Available in different languages
 - Skins based on Cascading Style Sheets
 - More.groupware is split into a core part, and individual modules
- **Requirements**
 - Linux / Windows / MacOS X
 - Apache / PHP / MySQL or PostgreSQL
- **Language Support**
 - Korean is not available until now
- **License**
 - Under the X11 license, some parts are GPL

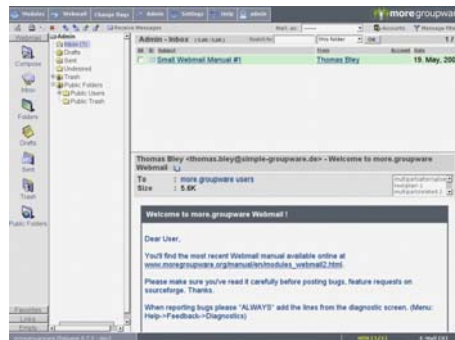

More.Groupware Screenshots

■ Contact Management

- Grouped, individuals can be assigned to companies
- Print lists with phone numbers, import and export vCard files

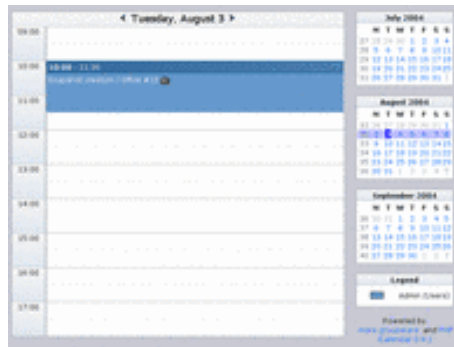

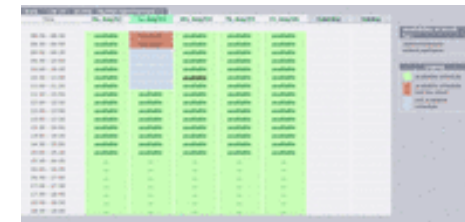

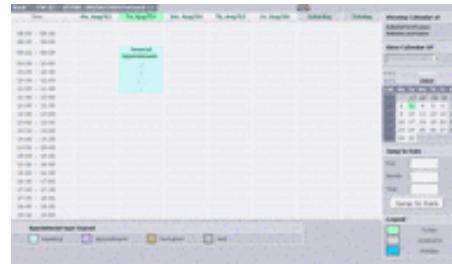

■ Webmail Module

More.Groupware Screenshots (Continued)

Calendar Module

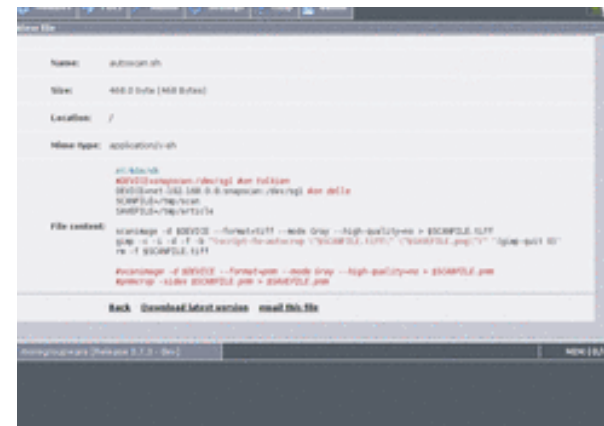

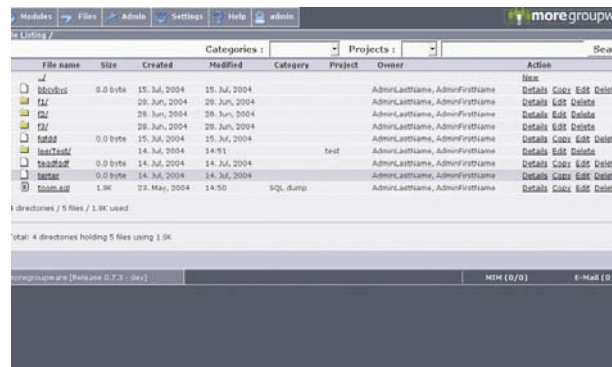

- schedule appointments, invite participants, view various calendar views, and much more you usually expect from a calendar application

More.Groupware Screenshots (Continued)

■ File Management

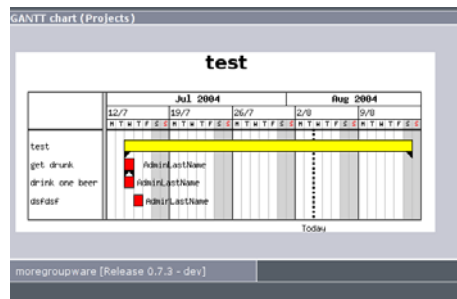

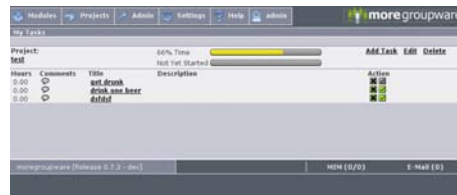

- Upload or create files, organize them in folders, view their details (this includes archive contents e.g.), download them or send them via the webmail module
- Create text files and edit them directly even allows you to use the module for keeping track of protocols, notes and other texts

More.Groupware Screenshots (Continued)

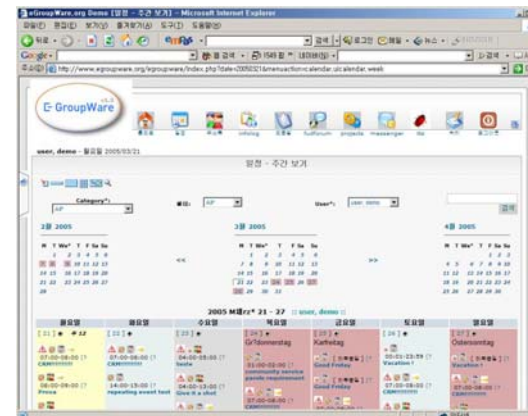

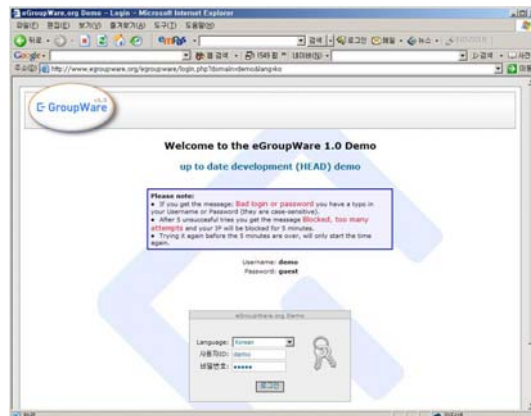

■ Project Management

- Offers a project management module, that allows you to define projects and assign tasks to them
- Tasks have their own time and status fields, can be subtasks of another task and depend on each other.
- All this can be visualized in GANTT charts

eGroupWare

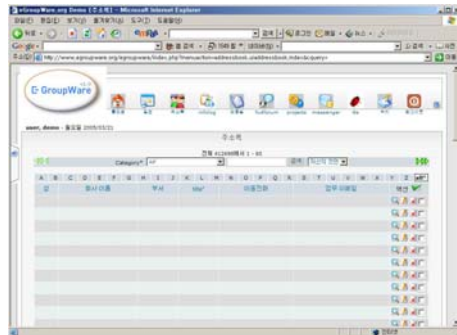

- **Homepage**
 - <http://www.egroupware.org>
- **Features**

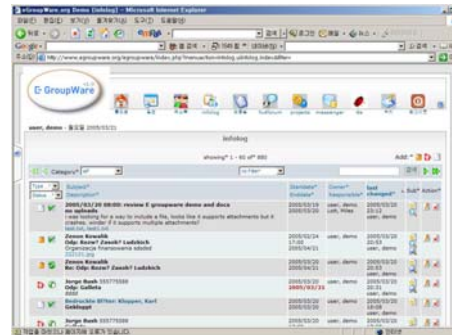

- **Requiements**
 - EGW is composed only of PHP, HTML and image files
 - MySQL or PostgreSQL or MSSQL preferred
 - Apache1.3.x with PHP4.3.x preferred.
 - Local or remote and IMAP or POP e-mail server
- **License**
 - GPL / LGPL

Eventum Issue Tracking System

- **Homepage**

- <http://dev.mysql.com/downloads/other/eventum/>

- **Features**

- General
 - Ability to run several projects with the same instance of Eventum
- Email Integration
- SCM Integration
 - Full integration with CVS
- Project Management
- Issue Listing
 - Ability to save and load unlimited custom filters
 - The total time spent working in each issue is available
 - Export the issue listing contents to Microsoft Excel
- Reporting Issues
 - Upload as many files as you want in one go
 - Report as many issues as you want without having to leave the issue report screen
- Command Line Interface
 - Quickly check and modify issues without opening a web browser

- **Requirements**

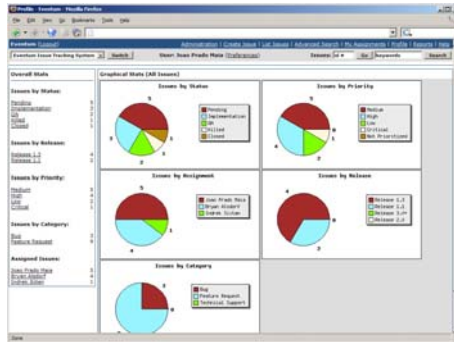

- PHP / MySQL / IMAP or POP3

- **License**

- GPL

Eventum Issue Tracking System

Profile

Grid Layout

The Grid Layout page displays a list of issues in a table format:

Issue ID	Summary	Status	Priority	Category	Platform	Product	Release	Created	Updated
1	High	Open	High	Feature Request	Windows	Product A	1.0	2014-01-01	2014-01-01
2	Medium	Open	Medium	Bug	Windows	Product A	1.0	2014-01-01	2014-01-01
3	Low	Open	Low	Bug	Windows	Product A	1.0	2014-01-01	2014-01-01
4	High	Open	High	Bug	Windows	Product A	1.0	2014-01-01	2014-01-01
5	Medium	Open	Medium	Bug	Windows	Product A	1.0	2014-01-01	2014-01-01
6	Low	Open	Low	Bug	Windows	Product A	1.0	2014-01-01	2014-01-01

Issue Detail

The Issue Detail page displays detailed information about a specific issue:

- Issue Overview:** A summary of the issue, including the title, status, priority, and category.
- Issue Description:** A detailed description of the issue, including the steps to reproduce the problem.
- Issue History:** A list of all actions performed on the issue, including updates, comments, and status changes.
- Issue Assignments:** A list of all users assigned to the issue, including their roles and the dates they were assigned.
- Issue Attachments:** A list of all files attached to the issue, including screenshots and documents.

Advanced Search

The Advanced Search page displays a complex search form with various filters and options:

- Search Criteria:** A list of search criteria, including status, priority, category, platform, and product.
- Search Options:** A list of search options, including search by status, priority, category, platform, and product.
- Search Results:** A list of search results, including the issue ID, summary, status, priority, category, platform, and product.

Administrator Page

The Administrator Page displays a list of users and their roles:

User ID	Username	Role	Status
1	Admin	Administrator	Active
2	User	User	Active
3	Guest	Guest	Active

TUTOS(The Ultimate Team Organization Software)

- **Homepage**
 - <http://www.tutos.org/homepage/about.html>

- **Requirements**
 - Apache / PostgreSQL or MySQL or Oracle or Interbase5 / PHP
- **Korean is available**
- **License : GPL**

TUTOS Screenshots

The screenshot shows a Mozilla browser window displaying the TUTOS web application's calendar. The browser's address bar shows the URL `http://next:82/tutos12/php/calendar.php`. The application interface includes a navigation menu with options like 'Calendar', 'Addresses', 'Bug Tracking', 'Products & Projects', and 'Teams'. A search bar is set to 'everything'. The calendar itself is a weekly view for the week of August 1st to 7th, 2004. It features various events such as 'Office' hours, 'Meeting Room', 'Weekly Jour Fix', and 'Vacation' blocks. The interface also includes a sidebar with search and document management options, and a footer indicating the version 'TUTOS 1.2beta.20040725'.
